**Wagenborg Nedlift - The art of heavy transport**

## Introduction

Wagenborg Nedlift provides a complete package of crane rental services. From a simple hoisting job using just one crane to a complicated lifting project that requires a wide range of equipment. Our clients include contractors in:

- oil and gas industry
- (petro-)chemical industry
- construction industry and infrastructure
- food & beverage industry
- power generation industry

## Network of branches

Wagenborg Nedlift has a large network of branches and depots and these can always be found in the vicinity of your project. This network ensures optimal availability of our cranes, rapid arrival times and a large amount of flexibility in the planning. This is precisely what you need for a good and efficient performance of your lifting work. Further details about all our branches can be found on the back cover of this brochure.

## Diverse and modern equipment

Wagenborg Nedlift has a modern and multifunctional crane fleet consisting of more than 150 units. We have got the right

- crane for every job. Our crane park consists of:
- mobile telescopic cranes ( 35-500 tons capacity)
- crawler cranes (120-750 tons capacity)
- all terrain cranes
- mobile tower cranes
- alternative hoisting methods

All our equipment is being inspected annually and a proper maintenance schedule is kept for every crane. We also have a large stock of certified hoisting tools and accessories available. This ensures the safe and reliable progress of your lifting operations.

## Skill and experience

Good equipment does not guarantee good work. It's the people using it who make your project successful. Wagenborg Nedlift's employees are all well-trained and properly qualified. But above all, they are experienced and committed people who are able to think together with you about the process. Our operational employees are supported by skilled and experienced project managers and engineers. Together they take care of a safe and efficient performance of your project.

## Engineering and job preparation

Any lifting job, big or small, starts with preparation. Our employees are familiar with the full range of services involved in vertical transport, such as:

- site visits
- work preparation
- drawing up of lifting plans
- set up of project execution plans
- safety and risk analyses
- lifting and transport engineering
- project management
