

Welcome to Royal Wagenborg

As experts in international transport by road and water, we offer custom made solutions for every transport need, expertly and with dedication. At Royal Wagenborg the word "impossible" does not exist. We believe that there is a solution for every transport requirement or logistical problem. We offer an integrated approach, including project support, equipment, experienced employees and a global network, reason why our clients have come to increasingly rely on our knowledge and expertise. At Royal Wagenborg safety and reliability are paramount. We are committed to providing you with the highest standard of quality.

FLOATING GINPOLE SYSTEM (FGP)

The floating ginpole system is a modular and flexible solution for assembly and disassembly activities (incl. decommissioning). It consists of tubing made out of multiple sections connected by flanges, a winch + HPU, Tirfors and rigging gear. The system can be built in to any derrick or structure strong enough to support its weight and load.

The system can be rigged up or down on site by our trained crew, without external lifting support and is operated in conjunction with rope access. Lifting capacity is provided by an electro-hydraulic winch. If required Wagenborg Foxdrill can also supply power generation for the system.

We are Wagenborg Foxdrill, and our company was founded in 1967 in Oldenzaal, the Netherlands.

Since then we have gained a large amount of experience in numerous countries around the world, under harsh conditions both onshore and offshore. The core value of our services is our personnel - highly qualified, engaged people, who persist when others stop.

During the last few years we have performed hundreds of rig moves, built state-of-the-art derrick packages, assisted many clients with accelerating their rig moves, modified and inspected many rigs and have driven numerous conductors. Using Wagenborg's own resources we are the partner for reputable companies.

The relationship with our clients is long-lasting, as we have served most of our clients for more than a decade.

Together we have developed our working methods and services to where we stand today - a professional service provider in the oil and gas industry that meets the highest standards.

Wagenborg Foxdrill constantly invests in training, new equipment and new techniques. By doing so we have made major strides regarding quality, health, safety and the environment.

Our philosophy is to sell our services through the optimum execution of projects rather than spending large budgets on commercial campaigns. We are as good as our last project; we rely on our people and our systems!

SPECIFICATIONS

SWL	5.0mt @ 5.0m luffing distance
Luffing distance	2 meters / 1 meter
Length	0 - 9m (360°)
Total weight	19775 mm
Operating temperatures	± 3700 kg
Standards & compliance	-20 °C - 50 °C
	The Machinery Directive 2006/42/EC, Annex IIB
	NEN-EN 10025-2, NORSOK N-003, NEN-EN 1990, NEN-EN 1993-1-1,
	NEN-EN 1993-1-8, NEN-EN 1993-1-9, LR Code for Lifting Appliances in a
	Marine Environment

AUXILIARY EQUIPMENT

Skid with tubes	3.350 x 1.850 x 1.300mm
Secondary skid with components	1.850 x 1.100 x 1.550mm
Winch 5t	2.300 x 1.200 x 1.080mm
HPU	1.800 x 1.750 x 900 mm

DIMENSIONS

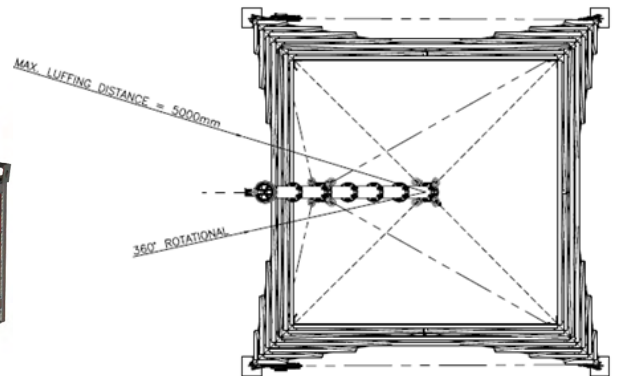

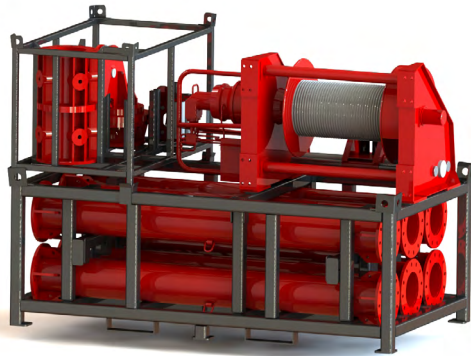

3.350 x 1.850 x 1.300mm
1.850 x 1.100 x 1.550mm
2.300 x 1.200 x 1.080mm
1.800 x 1.750 x 900 mm

WEIGHT

4.200 kg
1.185 kg
2.050 kg (incl. cable)
1.200 kg (incl. oil)

AUXILIARY EQUIPMENT

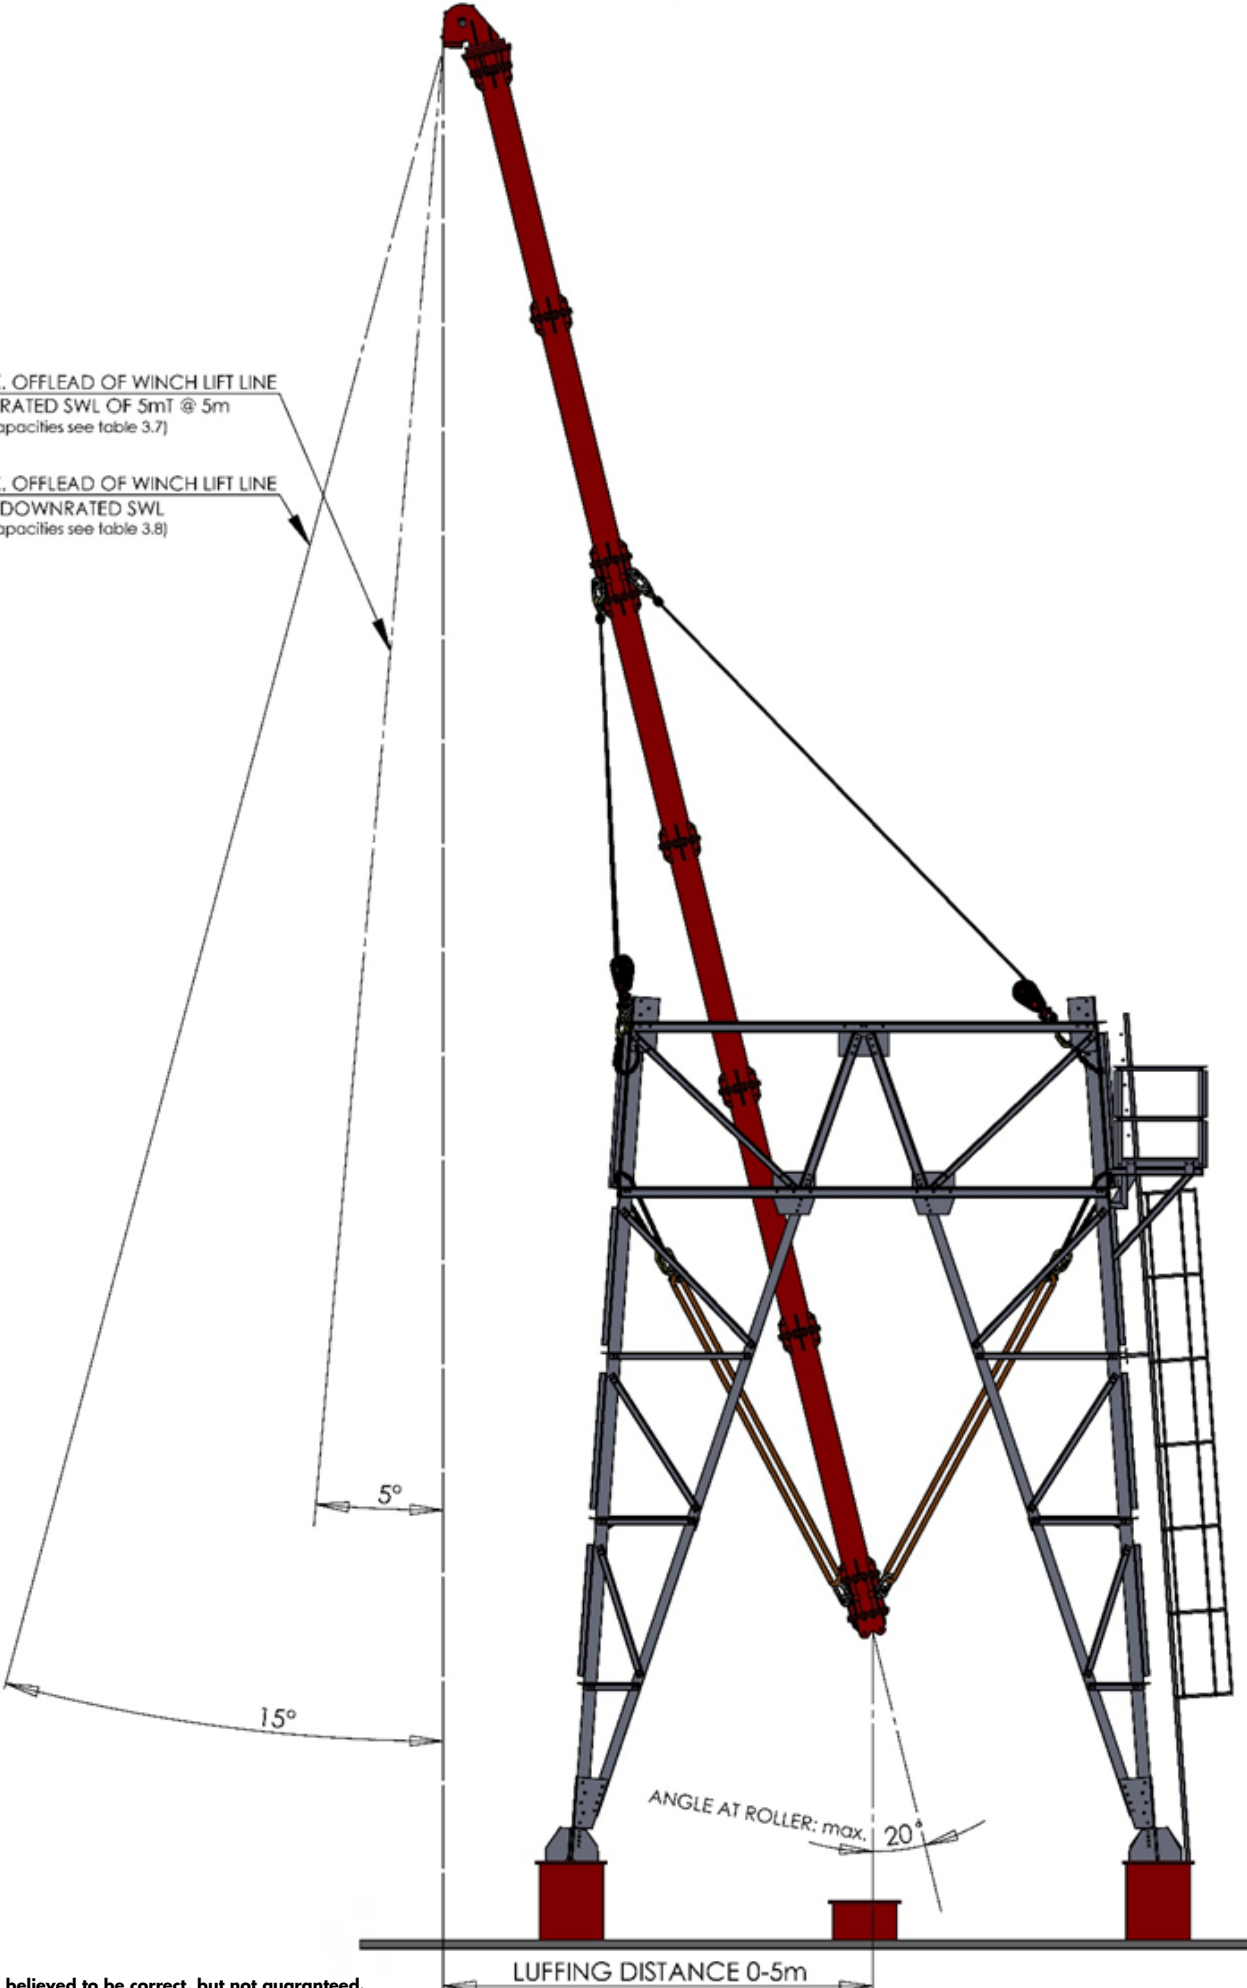

Load indication	Load cell with remote read out
FGP movement	Hand-operated tiffors 3.2t
Lifting	5t electro-hydraulic remote controlled (alternatives possible) winch + HPU (400V 125A, AC 50Hz)
Rigging equipment	Project specific

FLOATING GINPOLE SYSTEM

MAX. OFFLEAD OF WINCH LIFT LINE
FOR RATED SWL OF 5mT @ 5m
(for capacities see table 3.7)

MAX. OFFLEAD OF WINCH LIFT LINE
FOR DOWNRATED SWL
(for capacities see table 3.8)
